### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Ward.

Ward discloses the field of the invention, including a plurality of floats mounted upon a band or line, and a plurality of anchors secured to the band and ground. The float is rotatable about the band, since it is free to slide therealong (clamps **43** and **44** defining limits of sliding).

Re “rotary bearings), such fails to define any specific structure and/or arrangement so as to define over the U-bolts **36**. Such are positioned between float and band, and rotary motion is inherent as noted above, therefore, such function as plane bearings.

3. Claims 2-12 and 16-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ed Swinehart whose telephone number is 703-308-2566. The examiner can normally be reached on Monday through Thursday 6:30 am to 2:00 pm..
